Delaval, Jan RE: 09/202,464

Jan,

Please search peptide of SEQ ID NO: 4, 6-10, 12-14, 16-18, 21-27, 29, and 32-36 (close) against interference databases.

Thanks,

Neon Art Unit 1644 Office REM 3D75 Mail REM 3D70 Tel (571) 272-0846

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 12, Application US/08459850
Sequence 12, Application US/08459850
Patent No. 5665568
GENERAL INFORMATION:
APPLICANT: Peter H. Seeburg
TITLE OF INVENTION: Nucleic Acid Encoding the Alpha or
TITLE OF INVENTION: Using such Nucleic Acid
NUMBER OF SEQUENCES: 44
CORRESPONDENCE ADDRESS:
ADDRESSEE: Genentech, Inc.
STREET: 460 Point San Bruno Blvd
CITY: South San Francisco
STATE: California
COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     32.4%; Score 35; DB 1; Length 18; 33.3%; Pred. j Sequence 25, Application US/09865294

j Publication No. US20030068325A1

j GENERAL INFORMATION:
 j APPLICANT: Wang, Chang Y1

j TITLE OF INVENTION: Immunogenic peptide composition as vaccines for the
 j TITLE OF INVENTION: prevention and treatment of Alzheimer's Disease
 j TITLE OF INVENTION UNBERS: US/09/865,294

j CURRENT APPLICATION NUMBER: US/09/865,294

j CURRENT FILING DATE: 2001-05-25

j NUMBER OF SEQ ID NOS: 76

j SEQ ID NO 25

linGTH: 16

j TYPE: PRT

j CRCANISM: Measles virus

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Description

APPLICANT Exley, Mark A.;

APPLICANT Exley, Mark A.;

APPLICANT Brauer, Andrew, P.

TITLE OF INVENTION: Allergenic Proteins And Peptides From TITLE OF INVENTION: Applicant Proteins And Peptides From TITLE OF INVENTION: Sequence Cedar Pollen

COUNTRY: WAS THATE TO THE PROPY disk COUNTRY: USA

COUNTRY: WAS THATE TOOS/WAS-DOS

SOFTWARE: Patentin Release #1.0, Version #1.25

CURRENT APPLICATION DATA:

APPLICATION NUMBER: US/08/467,023

FILING DATE: Unne f, 1995

FILING DATE: Unne F, Remillard

REGISTRATION NUMBER: 08/350,225

FILING DATE: NUMBER: 08/350,225

FILING DATE: Remillard

REFERENCE CHARACTERISTICS:

LENGTH: 20 amino acids

TYPE: Innear MODELIC TION: Applied TYPE: Innear MODELIC TYPE: Innear MODEL

Patent No. 6719976

GENERAL INFORMATION:
APPLICANT: Sone, Toshio
APPLICANT: Mine, Akinori
APPLICANT: Mine, Mohake
TITLE OF INVENTION: Peptide-Based Immunotherapeutic Agent for Treating Allergic Disea
CURRENT APPLICATION NUMBER: US/09/142,524D
CURRENT PILING DATE: 1998-09-09
PRIOR PEPLICATION WUMBER: PCT/JP97/00740
PRIOR PELLING DATE: 1997-03-10
NUMBER OF SEQ ID NOS: 174
COSTWARE: Patentin version 3.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö
                                                                                                                                   ö
